

Old Heber Light & Power  
Flume was about 4 ft square  
& wooden, & open

It was removed in about 1915  
& a round, steel-banded oak  
flume was constructed

This later flume was  
abandoned & later still, torn out  
& the plant shut down.

The plant was destroyed  
1987, by Heber Light Co  
due to high insurance rates
